Boost TMC <> Hotels Collaboration

Improved data exchange to streamline processes
and enhance the traveler experience.

arise

We automate pre and post-stay data flow with hotels, **cutting Travel Management Companies related costs by 70 to 90%.**

AI Voice Agent

➤ Interacts efficiently with hotels at optimal times.

➤ Fills in or capture missing information as needed.

➤ Prevents check-in friction for travelers.

➤ Handles phone-based reservation tasks.

AI Auditor

➤ Automatically reconciles bookings and commissions.

➤ Flags and resolves any discrepancies with hotels.

➤ Secures accurate commission payments within 30 days.

➤ Provides an accurate overview of each hotel program.

Travelers expect a seamless experience.

AI will reshape the way travel is managed.

Our Partnership with DerbySoft

**Streamlined processes** combined with **direct connectivity** to hotel chains, **free from GDS constraints**.

- Correct rates
- Richer content
- Ancillaries / Perks / Loyalty
- Dynamic Promotions

TMC Staff

Arise Call Queue

Arise Call Automator

Hotel

TMC submits list of bookings through CSV, API or UI, for booking data confirmation.

Arise Call Automator picks booking up from queue and places call to the property, recording outcome of call.

Calls are placed at optimal time and retried when unsuccessful.

Automator returns booking status back to queue for review by staff at their leisure.
