

TIME TO TRANSITION

Many people in our industry are now being forced to change their careers, amid the chaos created by the coronavirus pandemic. It has happened at such an alarming speed and depth it's difficult sometimes to catch your breath. What is important to remember at times like this is that change can be good and can create opportunities that we would have never envisaged in normal times.

We are delighted to announce that The BTA has partnered with Travilearn and Avis Budget Group to deliver two courses designed for business travel consultants to help guide them through the challenges now facing them in their career.

The courses (sponsored by Avis Budget Group) are short, bespoke online workshops aimed to support those who have lost jobs from the coronavirus pandemic. Both courses, one for sales & accountant management staff and one for operational staff are now live and offered at the affordable, substantially discounted cost of £19.00* per person, ensuring considerable ease and accessibility to those of all financial circumstances. Each course been designed to assist in two critical areas and aims to support colleagues who are looking for employment following redundancy, whilst identifying and promoting the transferable skills they have obtained during their career in travel.

THE COURSES

WHO AM I ?
